

COMPANY PROFILE

smartFAB is an innovative startup, founded in 2018 and based in Milan, Italy, that designs, develops and markets intelligent tools that empower shop floor workers of all skill sets to make informed decisions at speed.

SOLUTION

Industrial Data Analytics platform that combines augmented data discovery, advanced analytics, and automated storytelling to deliver actionable, explainable insights for manufacturers of all sizes. It uses machine learning and AI to optimize processes, reduce waste, and achieve operational excellence, simplifying the analytics workflow and matching the manufacturer's level of data and analytics maturity.

DISTINCTIVE FEATURES

- Data-driven insights for an holistic representation of the factory.
- Real-time monitoring to detect anomalous behaviors and establish root cause of non-conformance.
- Prescriptive Analytics to get actionable recommendations.
- Predictive analytics to forecast unwanted outcomes.
- What if Analytics to explore scenarios and improve efficiency.
- Human-in-the-Loop approach to favor human-machine interaction and generate factory specific models.

TARGET MARKETS

Semiconductors, food and drink processing, plastics, mechatronics, automated assembly equipment, packaging equipment, tire production, consumer chemicals, white goods.
