GLOBAL PARTNERSHIP ON

Artificial Intelligence
(GPAI)

General Introduction

MEMBERS

North America

Europe

Asia

Oceania

15 international partners joined together to guide the responsible development and use of AI, grounded in human rights, inclusion, diversity, innovation, and economic growth.

They are now working with other interested countries and partners to announce a next wave of members, including emerging and developing countries

Overview of GPAI

GPAI brings together experts from:

- Scientific community
- Industry
- Civil Society
- Governments and International Organizations

to foster international collaboration and coordination on applied AI issues so that together we can shape the global agenda on the responsible adoption of AI

Forms an expertise-based initiative dedicated to AI

Promotes cross-sectoral and multistakeholder collaboration

Bridges the gap between theory and practice — Project-oriented

Takes into particular account emerging and developing countries

Builds on existing work being done domestically and internationally
